

How to Measure a 16ft Jib

This is to be read in conjunction with Appendix 2 of the Class Design Rules (10.12 to 10.20)

Rule	Notes
------	-------

10.12	Measure on dry flat surface. This sail is prior to being pulled out flat
-------	--

10.16	Method for gaining extension using two battens or rulers at tack
-------	--

How to Measure a 16ft Jib

This is to be read in conjunction with Appendix 2 of the Class Design Rules (10.12 to 10.20)

Rule Notes

10.15 Method for gaining extension using two battens or rulers at head

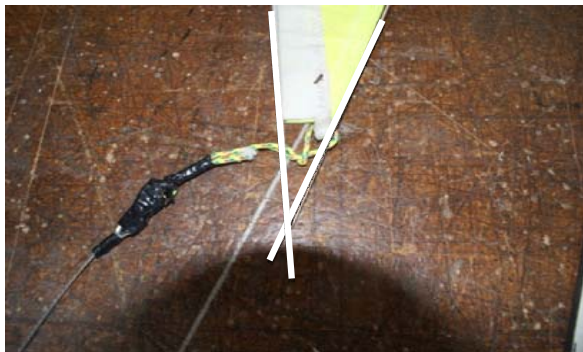

10.14 and 10.17 Shows string line around extension. Measurements are taken to nail (or extension) not sail. Photo shows extension at clew.

How to Measure a 16ft Jib

This is to be read in conjunction with Appendix 2 of the Class Design Rules (10.12 to 10.20)

Rule	Notes
------	-------

10.14	
-------	--

	Shows string line around extension. Measurements are taken to nail (or extension) not sail
--	---

Measuring P which is perpendicular to string line "A". Note: Measured from nail at clew to perpendicular with string line.
